

# ED PIP: Diagnostic Phase

## Checklist

# Diagnostic checklist

Before moving on to the solution design phase, we recommend revisiting the key tasks/deliverables from the diagnostic phase as a checklist to ensure you are set up to succeed in future phases. The following represents a sample checklist for the activities related to the diagnostic phase.

- Comprehensive value stream map developed and validated
- Root causes hypothesis developed
- 10 to 15 top opportunities identified
- DART tool used effectively and functioning correctly
- Performance management assessment completed
- Comprehensive communication plan put in place
- Front line staff and physicians involved in the diagnostic
